Total Assessment Factors	
Enter the total from the Yes column	
Halve the total from the Sometimes column. For example, if you answered "Sometimes" 7 times, then enter 3.5.	
Add the value from the 'Yes' column and the one-half value from the 'Sometimes' column. This is the total negative life quality score.	

The strain of caring for your pet is highly subjective. What one person can handle and what another can manage can be completely different. There is no 'wrong' way to feel. I believe it is good to ask yourself all of the questions above to honestly assess the different stressors you are dealing with—and maybe seek help with caregiving to help lighten the burden.

Below was my personal scoring system when managing my own dog's terminal illness. It may be helpful to you.

Caregiver Assessment	# of 'Negative Points'
You're managing your pet's ailments well. Consider talking with your veterinarian for additional suggestions that may make your pet's ailments easier to manage.	up to 10 points
The strain of caring for your pet may be negatively affecting your life quality. Make sure your pet is receiving medical attention so that ailments are managed appropriately. Look into ways to get help and take care of yourself.	11 - 20 points
Caring for your dog is negatively affecting your life quality. Remember, it's OK to be frustrated, sad, angry, confused, and a myriad of other emotions. It's also OK to consider end-of-life decisions for your dog, because their life quality is probably also quite diminished.	21 - 30 points
The burden you are feeling is considerable. Your dog's quality of life may also be poor. Consider end of life or palliative supported natural passing for your dog.	over 30 points
